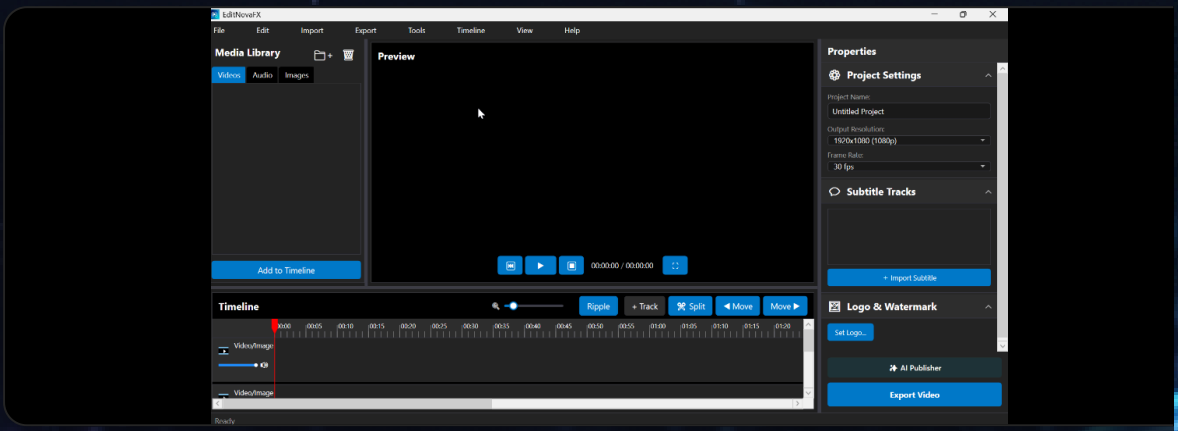
EditNovaFX

PROFESSIONAL VIDEO EDITING STUDIO



Intuitive Timeline Editing

Layer videos, images, and audio across intuitive tracks. Features precise drag-and-drop mechanics, seamless splitting, ripple deletion, and frame-accurate trimming with real-time preview.

AI-Powered Transcription

Generate highly accurate subtitles automatically from your audio tracks using local Whisper AI models. 100% offline processing ensures your unreleased footage never goes to the cloud.

Scripture Subtitle Automation

Uniquely tailored for ministry and localization. Feed an audio file and a standard USFM Bible file to automatically extract verse text and synchronize it seamlessly to the audio.

Advanced Subtitling

Full support for importing native SRT files. Control fonts, sizes, colors, outlines, drop shadows, and exact screen positioning to make your captions match your brand.

Direct-to-YouTube

Export and upload directly to your YouTube channel in one seamless motion. Set titles, descriptions, tags, and automatically apply Custom Thumbnails right from the app.

Customizable FFmpeg Engine

Powered by an industry-standard rendering backend. Export up to pristine 4K resolution, choose cinematic or standard frame rates, and easily overlay logos and watermarks.
